

XM Sattellite Radio has been the best thing that i have purchased for myself in years it has all of the great music, news and comedy taht i can't find on traditional radio. The constant traffic and weather are very beneficial to the area i live. With all the congestion it's great to have something to tell you what's going anytime you need it. I don't feel that National Association of Broadcasters should be able to tell me what i can or can't hear. Especially since this is a service for which i choose to pay. Please reject the NAB's petition 04-160. Thank You.
